OKOLJE

Zavedamo se, da ima turizem velik vpliv na družbeno in ekonomsko podobo destinacije, zato aktivno vključujemo lokalno skupnost in razvijamo turizem, ki prinaša pozitivne rezultate za vse.

V glamping Kolpa Resortu smo pozorni pri varovanju okolja, odgovorni rabi energije in vode ter ravnanju z odpadki.

V naše vsakdanje življenje smo že uvedli bio razgradljiva čistilna sredstva, ki so pridobila ekološki znak.

Spoštovani gostje, prosimo vas za sodelovanje in skrbno ravnanje z:

1. Voda

Voda je v našem resortu vsepovsod pitna.

S skrbno in odgovorno porabo vode v kopalnici in kuhinji je lahko porabimo manj. Pri miljenju rok in telesa ter umivanju zob, zaprimo pretok vode, še posebno tople.

2. Električna

Prizadevamo si, da bi kar najbolj zmanjšali porabo električne energije, zato smo navadne svetilke zamenjali z varčnimi led svetilkami in senzorji.

Prosimo vas, da ste pri porabi in uporabi varčni z uporabo električne energije.

Predlagamo nekaj enostavnih ukrepov: 1. Istočasno ne uporabljajte klimatske naprave in indukcijske kuhalne plošče.

2. NAMIG: Prosimo, ugasnite klimatsko napravo, ko zapustite prostor. Soba se bo shladila v manj kot 15 minutah, ko boste ob povratku ponovno prižgali klimatsko napravo.

Z upoštevanjem naših predlogov, boste prispevali k racionalni rabi virov.

3. Odpadki

Za ločevanje odpadkov imamo v resortu ekološki in sicer za:

- plastiko,
- preostale mešane odpadke
- biološke odpadke
- steklo.

Posebnosti belokranjskega podeželja

Pridite na podeželje in se prepustite raziskovanju ...

Bogata narava te nižje kraške pokrajine se ponaša s številnimi skritimi geološkimi pojavi. Prepletena z umetniškimi stvaritvami tvori slikovito kulturno krajino.

Živahna kulturna dediščina se je razvijala skozi tisočletja. Tukaj v sožitju živijo prebivalci treh ver in petih narodnosti.

MITREJ NAD ROŽANCEM

Mitrej nad Rožancem je eden najatraktivnejših arheoloških spomenikov v Sloveniji, ki se nahaja ob regionalni cesti Semič - Črnomelj, v vasi Rožanec.

Relief najverjetneje izvira iz drugega stoletja, medtem ko se je v skalo vklesana podoba boga Mitra ohranila v naravnem okolju v dolini kostanjevega gozda Judovje, pri cerkvi sv. Jurija. Odlitek reliefa iz 20. stoletja je razstavljen v Belokranjskem muzeju v Metliki.

VINICA - ROJSTNI KRAJ PESNIKA OTONA ŽUPANČIČA

Vinica je gručasto naselje, ki leži visoko nad reko Kolpo, ob slovensko-hrvaški meji in 18 km od Črnomlja. Vinica, naseljeno že v prazgodovini, danes zaznamuje mednarodni mejni prehod. Ostanke Viniškega gradu so pomemben dokument preteklosti.

Rojstna hiša pesnika Otona Župančiča se nahaja v središču Vinice in je bila obnovljena, saj je prvotna hiša pogorela v velikem požaru leta 1888.

V pritličju so razstavljeni pesnikovi spominki.

»SOSESKA ZIDANICA“, DRAŠIČI

Soseske zidanice ali vinogradniške zadruge so ena od belokranjskih posebnosti in so bile pomemben del povezovanja vaščanov že od 17. stoletja dalje.

Zidanica "soseska zidanica" se nahaja v kleti stare hiše v centru Drašičev, poleg cerkve sv. Petra. Svoje goste in vaščane sprejema že več kot 250 let.

Po obisku zidanice lahko rečete, da ste iz enega kozarca okusili vino 65 vinogradnikov. Izveste lahko tudi o rovašu, koščku kratkega cepljenega lesa, kjer so lastniki zapisali dolgotrajno za pitje ali uživanje vina vsakega pivca.

Odprija je za obiskovalce, ki spoznajo zgodovino in način delovanja soseske kot edinstvene vinske banke, ki je vpisana v register žive kulturne dediščine na Slovenskem.

ŠOKČEV DVOR, ŽUNIČI

Šokčev dvor v Žuničih je tipična belokranjska kmečka hiša bližnje Kolpe in je eden izmed zaščiteneh kulturnih spomenikov Krajinskega parka

Kolpa.

Kmetijo lahko opazimo ob cesti Vinica - Adlešiči ob vstopu v vas, kakšnih 20 km od Črnomlja. To je kmečka hiša z zaprtim dvoriščem, sestavljena iz hiše, lope in skednja, ki so med seboj povezani z zidom in z vhodnimi vrati.

V tej prenovljeni hiši si lahko ogledate kmečko sobo, kjer je razstavljeno staro pohištvo, zibelka, stara kmečka oblačila in domače perilo. Drugi prostor s staro pekarno služi kot jedilnica, ki je kot nalašč za skupine in vse ostale obiskovalce, da se usedejo in razmišljajo ...

LETALO DC-3, OTOK

Letalo se nahaja ob cesti Črnomelj - Metlika, v smeri vasi Otok, 5 km od Metlike. Letalo je namenjeno vsem slovenskim in belokranjskim letališčem, ki so delovala v času NOB. Letalo si lahko ogledate kadarkoli, v bližini letala pa se nahaja športno letališče Prilozje.

Sprehodite se po parku Lahinja

Naj vas želva Sklednica popelje v skrivnosti narave

KP LAHINJA

Spoznajte zaščiteno območje zgornjega dela toka reke ter njene gozdove, močvirja, kraške travnike in skrivnostno podzemno jezero. Skozi enega izmed dveh naravnih rezervatov v Krajinskem parku Lahinja se lahko sprehodite po podestu in splezate na opazovalnico.

Obiščite tudi Klepčovo žago in stari mlin. V vasi Veliki Nerajec najdete 200-letno etnološko zakladnico in poskusite lokalno kulinarično posebnost, slastno ajdovo povitico.

Naravni zakladi

Narava in marljivo človeško delo sta se v Beli krajini združila v slikovito kulturno krajino.

Bela krajina je pretežno kraška pokrajina med Gorjanci, Kočevskim rogom in Kolpo. Hribovito območje Gorjancev in Kočevskega roga se postopoma spušča do Kolpe.

Kar 46 % Bele krajine je vključenih v Natura 2000, kar samo po sebi priča, kako izjemno pester in ohranjen je ta življenjski prostor.

STELJNIKI

Pokrajina Bela krajina se ponaša tudi s površinami, poraslimi z brezami in podrastjo orlove praproti, po domače steljniki. Najlepše praprotnice najdemo v Vinomerju pri Metliki in v bližini Marindola, vasi južno od Adlešičev.

MIRNA GORA

Mirna gora je najvišji vrh Bele krajine (1047 m) in tudi eno naj-jugovzhodnejših vzpetin prostranega gorskega masiva Kočevski Rog.

Zagotavlja fantastičen razgled na Belo krajino

in Kolpo vse do Karlovca in Gorskega kotarja na Hrvaškem. Planinski dom je edina stalno negovana visokogorska postojanka. Mirna gora in Planina pod njo sta izhodiščni in končni cilji številnih sprehajalnih poti.

Površinsko nahajališče boksita v Hrastu pri Vinici

V bližini vasi Hrast pri Vinici lahko obiščete eno največjih in površinsko eno najlepših nahajališč boksita v Sloveniji. Boksit se oblikuje že milijone let, zaradi česar je zelo pomembna geološka naravna dediščina. Plasti boksita se nahajajo ob vaški luknji Krivača in v bližnjem ozkem prehodu ceste. Tu je boksit prekrit in pomešan s humusom. Kupi umetno nakopičenega materiala so posledica eksperimentalnega rudarjenja.

SMUK NAD SEMIČEM

Smuk je 547m visoka planota nad Semičem. Smuk predstavlja drugi dom lovcu, rekreativcu in ljubitelju narave s prenovljeno lovsko kočjo, ki jim daje dober razlog, da "pustijo vse stiske za seboj".

JELŠEVNIK IN Črni močeril - PROTEUS ANGUINUS

Črni močeril ali proteus anguinus so odkrili kakšnih 300 let za njegovim belim dvojnikom, leta 1986, v bližnjem izviru Dobličice, kasneje pa tudi v izviru Jelševnik.

Izvir Jelševnik je edini kraj, kjer lahko črnega močerila opazujemo v njegovem naravnem okolju.

Je vodna dvoživka in največja jamska žival. Zaradi svoje obarvanosti je še posebej zanimiva črna človeška ribica, ki živi samo na belokranjskem plitvem krasu, na zaplati približno 10 km².

Infocenter na Domačiji Zupančič je bil zasnovan z željo po ozaveščanju o pomenu ohranjanja čistega okolja ter služi različnim ciljnim skupinam. Strokovnjaki v pokritem šotoru, kjer se nahaja kraški bruhalnik, opravljajo najrazličnejše analize.

IZVIR REKE KRUPA

Reka Krupa je največji izvir v Beli krajini, v katero se stekajo podzemne vode iz hribovitega dela Bele krajine.

Reka priteče na površje sredi severnega dela belokranjske ravnine, v vasi Krupa, približno 3 km od Semiča. Reka teče pod 20 m visoko skalno steno.

Ob strugi reke, ob kateri se vije učna pot, boste preko brvi, mimo treh mlinov in jame Judovska hiša, prišli do nahajališča svetovno znane jamske školjke Congeria jalcici in bele človeške ribice.

Najboljša je domača hrana in pijača lokalnega izvora!

Blaga klima, rodovitna zemlja in pridne roke se združijo pri ustvarjanju čudovitih domačih dobrot.

V Beli krajini je v porastu lokalna samoskrba. Lahko brskate in kupujete neposredno na kmetijah ali pa obiščete kmečke tržnice v Črnomlju ali Metliki.

Obiščete lahko dobavitelje naslednjih dobrot: med in izdelki na osnovi medu, mleko in mlečni izdelki, kruh in pecivo, sokovi in žgane pijače, suhomesnati izdelki ...

Bela krajina je znana po avtohtonih sortah čebule (gribeljka) in česna. Belokranjci so zelo ponosni na kakovost svojih vin, tako rdečih kot belih.

Metliška Črnina in Belokranjec sta razvrščena PTP – priznana tradicionalno poimenovanje. Prvi slovenski vini, ki sta dobili oznako PTP, pa sta metliška črnina in belokranjec.

Belokranjska pogača, tradicionalno kvašen kruh, posuta s kumino in grobo soljo, je uvrščena med TSG – Zajamčena tradicionalna posebnost.

- Ni možnosti vračila depozita.

Vse odpovedi je treba pisno potrditi.

Če opazite, da je katera oprema videti okvarjena in / ali nevarna, čim prej obvestite letovišče.

Kolpa Resort ima pravico do odpovedi nadaljnjih storitev in odpovedi nastanitvene pogodbe, če gost:

1. krši hišni red, še posebej, če s svojim vedenjem moti druge goste,
2. ne plača računa za opravljene storitve oz. po predhodno sklenjeni ponudbi,
3. zbolí za nalezljivo boleznijo, ki je nevarna za druge goste v celotnem objektu. Hkrati je letovišče tudi upravičeno do odškodnine.

Pridržujemo si pravico, da v primeru izjemnih pogojev in čiščenja zapremo bazenski kompleks.

Pridržujemo si pravico do zapiranja bazena v primeru nalezljivih bolezni, pandemije, epidemij ali v primeru, ko je vlada podala priporočila za zapiranje bazenov.

ENVIRONMENT:

We are aware that tourism has a great impact on the social and economic image of the destination, so we actively involve the local community and develop tourism that brings positive results for all.

At the glamping Kolpa Resort, we pay attention to environmental protection, responsible use of energy and water, and waste management.

We have already introduced biodegradable cleaning products into our daily lives, which have acquired an ecological label.

Dear guests, we ask you to cooperate and handle with care:

1. Water

The water in our resort is drinkable everywhere.

With careful and responsible use of water in the bathroom and kitchen, we can use less. When grinding hands and body and brushing teeth, close the flow of water, especially warm.

2. Electricity

We strive to minimize electricity consumption, so we have replaced ordinary lamps with energy-saving LED lamps and sensors.

We also suggest some simple steps:

1. Do not use air condition parallel with induction cooking hob.

2. TIP: Please turn off the air condition when leaving the room. The room will be cooled in less than 15 minutes when you turn on AC again.

By following our suggestions, you will contribute to the rational use of resources.

3. Waste

For waste separation, we have an eco island in the resort, namely for:

- plastic,
- remaining mixed waste
- biological waste
- glass.

Special features of Bela krajina countryside

Come to the Countryside and Let Yourself Explore ...

The opulent nature in this lower karstic landscape boasts many hidden geological phenomena. Interwoven with manmade creations, it forms a picturesque cultural landscape. A vibrant cultural heritage has developed through the course of millennia. Here, residents of three faiths and five ethnicities live in harmony.

MITREJ ABOVE ROŽANEC

Mitrej above Rožanec is one of the most attractive archaeological monuments in Slovenia, which is located along the regional road Semič - Črnomelj, in the village Rožanec. The relief most likely originates from the second century, whereas the image of god Mitra carved into a rock has been preserved in its natural environment in the valley of chestnut forest Judovje, near the Church of St. George. The cast of the relief from the 20th century is exhibited in the Belokranjski Museum in Metlika.

VINICA - THE BIRTHPLACE OF POET OTON ŽUPANČIČ

Vinica is a clustered settlement situated high above the river Kolpa, next to the Slovenian-Croatian border, and 18km from Črnomelj. Vinica, inhabited back in prehistoric times, is nowadays marked by an international border crossing. The remains of the Vinica Castle are an important document of the past. The birth house of the poet Oton Župančič is located in the centre of Vinica and has been renovated, as the original house burnt down in the great fire of 1888. The poet's memorabilia is displayed on the ground floor, while the first floor is dedicated to his Vinica compatriot Oton Berkopec. The bust of Župančič by Jakob Savinšek can be seen in the garden.

VINEYARD COTTAGE "SOSESKA ZIDANICA", DRAŠIČI

The vineyard cottage "soseska zidanica" is located in the cellar of an old house in the centre of Drašiči, next to the Church of St. Peter. It has been welcoming its guests and villagers for over 250 years. After visiting the vineyard cottage you can say you have tasted the wine of 65 winegrowers from a single glass. You can also learn about "rovaš", a piece of short split wood, where owners scored drinking debts or wine consumption of every drinker.

ŠOKČEV DVOR, ŽUNIČI

Šokčev dvor in Žuniči is a typical Bela krajina farm house of the near Kolpa region, and is one of protected cultural monuments of the Kolpa Regional Park. The farm can be spotted off the Vinica - Adlešiči road when entering the village, some 20km from Črnomelj. This is a farm house with an enclosed courtyard, consisting of a house,

a shed, and a barn, all connected by a wall with an entrance door. In this renovated house you can see the farm room, where old furniture, cradle, old farm clothes, and home-made linen have been put on display. The other room with an old baker's oven serves as a dining room, which is perfect for groups and all other visitors to take a seat and ponder away...

DC-3 AIRPLANE, OTOK

The airplane is located along the road Črnomelj - Metlika, in the direction of the village Otok, 5km from Metlika. The plane is dedicated to all Slovenian and Bela krajina airports operating during the time of the National Liberation Front. The plane can be seen at any time, while the sport airport Prilozje is situated in the vicinity of the plane.

Take a walk through the park Lahinja

Let the 'Sklednica Turtle' guides you in the secrets of nature

The offer of tourist destinations of Bela krajina includes a walk through the park for a day, a weekend, and shelters perfect locations for holidays. The first stay is Pusti Gradec. At the tourist farm Klepčeva domačija the locals will kindly show you the mill, where you can take a supply of wheat, buckwheat or maize flour. The sight also shelters the Venetian sawmill.

Tourist guides will tell you the area around the river loop was already settled in the Neolithic period. In the 16th century there stood a castle. You will take a walk to the top of the loop, where the church of All Saints stands in the midst of the burial ground. A unique signature of an unknown builder, who visualised someone's idea, can be found on the northern side of the church.

The final part of the presentation includes a display of archaeological items, among them the actual gold coin of Kralj Matjaž.

The next stop is Veliki Nerajec. Locals will show you around the village and tell you about the lives of local people. The central part of the village is the park Info center – a 200-year old house with a black kitchen and a chamber. Following a prior agreement you can enjoy a ride with a rack-wagon or a "zapravljivček" carriage around the park, or a sleigh ride in winter.

Above the info centre stands the cottage industry and arts and crafts gallery with products created by the skilful artist Vera Vardjan.

Veliki Nerajec is the winner of a special European award for countryside development and village renovation in 2000.

The village Belčji vrh is a clustered settlement on a lonely hill with sinkholes. Under the village is a spring Zajm, one of the main sources of Lahinja, which is a perfect spot for resting.

Natural treasures

Nature and diligent human handiwork have come together in Bela krajina to form a picturesque cultural landscape.

Bela krajina has a predominately karstic topography and therefore features a variety of karstic phenomena. The hilly area of Gorjanci and Kočevski rog gradually descends to the Kolpa river below. As much as 46% of Bela krajina is included in Natura 2000, which is itself a testament to how exceptionally varied and well preserved this living space is.

FERN AREAS

The region of Bela krajina also boasts areas overgrown with birch trees and undergrowth of eagle fern, locally known as "steljniki". The most beautiful fern areas are found in Vinomer near Metlika and in the vicinity of Marindol, a village south from Adlešiči. The meaning of the name Bela krajina derives from white birch trees.

MIRNA GORA

Mirna gora is the highest peak in Bela krajina (1047 m) and also one of the southeasternmost risings of the vast Kočevski Rog mountain massif. The belvedere guarantees a fantastic view of Bela krajina and Kolpa all the way to Karlovac and the Gorski Kotar mountain range in Croatia. The mountain lodge is the only constantly tended highland post. Mirna gora and Planina below it are the starting points as well as final destinations for many walking routes.

HRAST PRI VINICI BAUXITE DEPOSIT

In the vicinity of the village Hrast pri Vinici you can visit one of the biggest and surface-wise one of the most beautiful bauxite deposits in Slovenia. Bauxite has been shaping for millions of years, which makes it a very important geologic natural heritage. Bauxite layers are located by the village water hole Krivača and in the nearby narrow pass of the road. Here bauxite is covered by and mixed with humus. Heaps of artificially accumulated material are the result of experimental mining.

SMUK ABOVE SEMIČ

Smuk is a 547m high tableland above Semič. Towards the south and southeast Smuk lowers into the embrace of the Semiška gora on the sunny side, making its way through forests, towards its foothills, into the clustered, partly dispersed settlement Semič. Smuk represents a second home to a hunter, a recreational athlete, and a nature lover with the renewed hunter's lodge giving them a good reason "to leave all troubles behind".

SOURCE JELŠEVNIK AND PROTEUS ANGUINUS FROM BELA KRAJINA

The black proteus or proteus anguinus is the subspecies of the proteus. It was discovered some 300 years after his white counterpart, in 1986, in the nearby source of Dobličica, and later also in the source Jelševnik. The source Jelševnik is the only place, where the black proteus can be observed in its natural environment. You can also find the black proteus in the Zupančičeva house located in the vicinity the source, where it is possible to see the film about the proteus, or simply enjoy food and fish specialities.

SOURCE OF THE RIVER KRUPA

The river Krupa boasts the biggest source in Bela krajina, into which underground waters from the hilly part of Bela krajina flow. The river comes to surface in the middle of the northern part of the Bela krajina flat area, in the village Krupa, some 3km from Semič. The river surfaces under a 20m high rock wall. The source is the living space of the proteus and is the only known habitat of the cave shell *Congerius kusceri* in Slovenia. The river Krupa and its surroundings represent a part of the educational path »From Lebica to Krupa«.

Locally sourced and homemade food and drink is best!

Mild climate, fertile soil and hardworking hands come together to create wonderful homemade delicacies. Local self-sufficiency is on the rise in Bela krajina. You can browse and buy straight from the farms or you can visit the farmers' markets in Črnomelj or Metlika. You can visit the suppliers of the following delicacies: honey and honey based products, milk and dairy products, bread and pastry, juices and spirits, cured meat products, fresh fruit and vegetables.

Bela krajina is known for its indigenous varieties of onion ("gribeljka") and garlic.

The people of Bela krajina take great pride in the quality of their wines, red and white alike.

For instance, Metliška Črnina and Belokranjec are classified as PDO – Protected Designation of Origin. "Belokranjska pogača", a traditional leavened flatbread sprinkled with caraway and coarse salt, is classified as TSG – Traditional Speciality Guaranteed.
